# HOW TO CHANGE OUTPUT DIRECTORY

1. First Click on the setting that appear on the solution explore.

2. Then a dialog box appears. In that there are any options. Select Configuration Properties. Inside that there is an option General and in that you can see and Output Directory and on the right you can see a dropdown button. Select that and click Edit.

3. Then in the url provide the below given url inorder to change the path of the file. So on this path the file will be saved in the bin folder. And after entering the url click Ok and then click apply and ok. This will help you to save the files in the bin folder.
